Protect Yourself

- △ Three years of continuous protection with zero maintenance costs
- A Rugged, IP-66/67 highly water-resistant design
- △ Continuous, alphanumeric, status LCD shows detector life remaining, alarm setpoints and advises self-test status
- △ Built-in concussion-proof boot
- Records and displays the peak alarm encountered and time elapsed since the exposure occurred
- △ Automatically test and store results with BW's MicroDock II system
- ▲ Event log of ten most recent exposure events downloadable via built-in IR COM port to a printer, computer or MicroDock II docking station module
- △ Two alarm levels (Low / High)
- △ Loud (95 dB typical) audible alarm and bright, quad-LED indication on alarm
- A Internal vibrator alarm standard
- △ Compact (1.1 x 2.0 x 3.2 in. / 28 x 50 x 81 mm) and lightweight (2.7 oz. / 76 g)
- Maintenance free—no sensor or battery replacement, no calibration, no downtime
- △ Full-function self-test of audible/visual alarms, plus integrity of sensor, battery and circuitry
- △ Continuously ON—one-button activation, test and data transmission
- Comes complete with rugged, stainless-steel alligator belt clip and test cap
- △ Instructions in local languages included

GasAlertClip Extreme 3

3-Year Gas Detection with Event Logging

Simply press the START/TEST button and the GasAlertClip Extreme 3 is ready to use, providing three years of continuous, maintenance-free operation from the day of activation.

The GasAlertClip Extreme 3 is highly water-resistant, with an IP-66/67 housing fully-immersible to a depth of one meter. The GasAlertClip Extreme 3 housing includes an integral concussion-proof boot, and a heavy-duty, stainless steel, alligator style belt-clip. A large easy-toread LCD shows detector life remaining, two alarm setpoints, and peak alarm exposures.

The detector's life remaining is displayed in months, then days, then hours. A fullfunction self-test verifies sensor, circuitry and battery integrity as well as function of the audible, visual and vibrator alarms.

Stored data can be transmitted directly via IR link to a cordless infrared printer for immediate printout, to a MicroDock II docking station module, or to a personal computer by means of an IR adapter connected to the computer's USB port.

Simply clip the GasAlertClip Extreme 3 to your lapel, pocket, belt or hard-hat for unequaled, cost-effective protection.
